Wood- glass doors

Wood-glass doors

Expertly combined materials

The decorative wood-glass doors from LEBO combine the timeless brightness of glass with the pronounced variety of designs of wood doors.

You can therefore combine wooden decorations with attractive light openings and glass surfaces. Whether you choose, transparent or satinised finishes, or light openings with trellis frames: our wood-glass doors suit modern, country and conventional living styles.

Together with beautiful windows, our wood-glass doors make the light sparkle into your living areas in a natural way.

Individual colour accents become more lively with natural light.

Many of our CPL surfaces in wood effect are available both in upright and horizontal designs. The wood grain of the frames runs vertically in both models.

Bring some light to the dark!

Elegant glass doors

As partners for colours and designs

Our tip: When glass is used in the design itself, this always creates a particularly harmonious effect.

Harmonised ac

Because of their smart and low-profile appearance, glass doors are especially good for combining with colours and designs.
